Mean, Median, Mode, and Range (A)

Calculate the mean, median, mode, and range of each set of numbers.

- 1) {18, 18, 63, 63, 84}
- 2) {19, 21, 29, 32, 89}
- 3) {41, 41, 41, 44, 90}
- 4) {25, 37, 39, 85, 85}
- 5) {12, 36, 64, 65, 82}
- 6) {30, 57, 59, 76, 91}
- 7) {27, 27, 49, 77, 84}
- 8) {25, 46, 62, 76, 97}
- 9) {22, 35, 58, 63, 75}
- 10) {45, 45, 47, 88, 89}
- 11) {58, 84, 90, 90, 97}
- 12) {25, 36, 36, 40, 68}
- 13) {18, 18, 33, 34, 54}
- 14) {19, 19, 27, 36, 64}
- 15) {34, 52, 75, 85, 90}
- 16) {55, 57, 68, 82, 99}

14) 5.72, 4.9, 5.1, 4.28, 5.19		
15) 0.26, 0.72, 1.3, 0.5, 1.34		
16) 4.99, 4.2, 3.98, 4.8, 3.7		

Answer: the median is 5. This gives us: 0.1, 0.2, 0.3, 0.4, 0.4, 0.4, 0.6, 0.6, 0.7, 0.9 Step 2) Check the number of data points in both lists is the same. The median is the midpoint (or middle value) of a set of numbers. This gives us: 9, 12, 14, 15, 21, 27, 30, 32 Step 2) Check the number of data points in both lists is the same. It is found by adding up the set of numbers and then dividing the total by the number of data points in the set. Here are our selection of box plot worksheets to help you practice creating and interpreting box plots. We have plenty of worksheets on this page to help you practice the skills of multiplying 2-digit numbers by 1 or 2 digits. How to find the mean Step 1) Add up all the numbers in the set. More Double digit Multiplication Worksheets (harder) Take a look at some more of our worksheets similar to these. Follow these 3 easy steps to get your worksheets printed out perfectly! The Math Salamanders hope you enjoy using these free printable Math worksheets and all our other Math games and resources. We welcome any comments about our site or worksheets on the Facebook comments box at the bottom of every page. Answer: the range is $11 - (-7) = 18$. Need to create your own long or short multiplication worksheets quickly and easily? Page 2 Welcome to our 2 Digit Multiplication Worksheets page. Back to Top These printable mean median mode range worksheets have been carefully graded to ensure a progression in the level of difficulty. Multiplication Math Games How to Print or Save these sheets Need help with printing or saving? Both lists have 10 data points. On some of the easier sheets, only odd numbers of data points have been used. The sheets in this section will help you to find the mean of a range of numbers, including negative numbers and decimals. The 3rd sheet involves decimals and negative numbers. How to find the median Step 1) Order the numbers in the set from smallest to largest. There are a range of sheets involving finding the mean, and also finding a missing data point when the mean is given. Follow these 3 easy steps to get your worksheets printed out perfectly! How to Print or Save these sheets Need help with printing or saving? Our quizzes have been created using Google Forms. Step 3) The mode is the data point which is the most common. The Mean, Mode, Median, and Range Worksheets are randomly created and will never repeat so you have an endless supply of quality Mean, Mode, Median, and Range Worksheets to use in the classroom or at home. For more information on the information we collect, please take a look at our Privacy Policy We would be grateful for any feedback on our quizzes, please let us know using our Contact Us link, or use the Facebook Comments form at the bottom of the page. Within each section, the sheets are carefully graded with the easiest sheets first. Sheets 1 to 4 consists of 15 problems; sheets 5 and 6 consist of 20 problems. You can print a copy of your results from this page, either as a pdf or as a paper copy. Step 2) Find the middle number. It is found by putting the data into an ordered list and find the difference between the largest and smallest amount. Answer: the mode is 0.4. Back to Top The range is the gap between the smallest and largest data point. There are a range of sheet involving reading and interpreting graphs as well as drawing your own graphs. The mean is the average of a set of numbers. The sheets in this section will help you to find the median of a range of numbers, including negative numbers and decimals. Sheets 2 to 4 have harder 2-digit numbers to multiply and answers that are generally larger than 1000. Example 2) Find the mode of 0.6, 0.3, 0.4, 0.2, 0.4, 0.7, 0.6, 0.1, 0.4, 0.9 Step 1) Put the data into an ordered list. Our Mean, Mode, Median, and Range Worksheets are free to download, easy to use, and very flexible. Example 2) Find the mean of 8, 2, 5, 7 and 13 Step 1) Add up the numbers to give a total of $8+2+5+7+13=35$ Step 2) Divide by the number of data points. It can be found by putting the data into an ordered list and seeing which data point occurs most often. We also collect the results from the quizzes which we use to help us to develop our resources and give us insight into future resources to create. These Mean Mode Median and Range Worksheets will generate 10 Mean Mode Median and Range problems per worksheet. All the free 3rd Grade Math Worksheets in this section are informed by the Elementary Math Benchmarks for 3rd Grade. Finding the Range Examples Example 1) Find the range of 14, 21, 9, 32, 27, 15, 12, 30 Step 1) Put the data into an ordered list. The sheets in this section will help you to find the mode and range of a set of numbers, including negative numbers and decimals. Example 2) Find the range of 6, 2, -7, 2, -5, 11, 3, -4, 0, 9 Step 1) Put the data into an ordered list. Examples Example 1) Find the median of 5, 7, 8, 2 and 4 Step 1) Put the numbers in order: 2, 4, 5, 7, 8 Step 2) There is an odd number of values in the set so the median is the middle value which is 5. We have split the worksheets on this page into two sections: 2-digit x 1-digit multiplication (3rd grade) 2-digit x 2-digit multiplication (4th grade) Each section ends with some trickier challenge sheets for more able students. Using these sheets will help your child to: learn their multiplication tables up to 10×10 ; understand and use different models of multiplication; solve a range of Multiplication problems. Click here for a Detailed Description of all the Mean, Mode, Median, and Range Worksheets. Mean Mode Median and Range Definition Worksheets These Mean Mode Median and Range Worksheets will produce a handout for the students that give examples and definitions for Mean, Mode, Median, and Range. Example 2) Find the median of 23, 27, 16, 31 Step 1) Put the numbers in order: 16, 23, 27, 31 Step 2) There is an even number of values in the set, so the median is the average of the middle two values. Click the image to be taken to that Mean, Mode, Median, & Range Worksheet. Here is a graphic preview for all of the Mean, Mode, Median, and Range Worksheets. Examples Example 1) Find the mean of 5, 7, 8 and 4 Step 1) Add up the numbers to give a total of $5+7+8+4=24$ Step 2) Divide the total by the number of data points. Here you will find a range of Free Printable Multiplication Games to help kids learn their multiplication facts. On the harder sheets, both odd and even numbers of data points have been included. You can select different variables to customize these Mean, Mode, Median, and Range Worksheets for your needs. These printable mean median mode range problem sheets will help your child to use and apply their skills to solve problems. Step 2) Divide the total by the total number of data points in the set. Sheet 1 involves 2-digit by 2-digit multiplication with smaller numbers and answers up to 1000. $24 \div 4 = 6$ Answer: the mean is 6. We do not collect any personal data from our quizzes, except in the 'First Name' and 'Group/Class' fields which are both optional and only used for teachers to identify students within their educational setting. Both lists have 9 data points. For incorrect responses, we have added some helpful learning points to explain which answer was correct and why. - If there is an even number of values in the set, then the median is the average of the two middle values. This will take you to a new webpage where your results will be shown. At the end of the quiz, you will get the chance to see your results by clicking 'See Score'. Welcome to the Math Salamanders Mean Median Mode Range Worksheets. Sheets 3 to 6 involve multiplying a 2-digit number by single digit numbers and finding increasing trickier products. Finding the Mode Examples Example 1) Find the mode of 3, 6, 4, 3, 2, 4, 7, 8, 6, 3, 9 Step 1) Put the data into an ordered list. The 4th, 5th and 6th sheets are similar to the first 3 sheets but with increased number of data points. These 2-digit multiplication worksheets have been designed for more able students who need that extra challenge! These sheets are aimed at 4th graders. Step 3) The range is the difference between the largest and smallest data point. The first sheet involve finding the mean, median, mode and range of some positive whole numbers. Answer: the mode is 3. There are easier sheets involving fewer data points, and harder ones with more data points. These 2-digit multiplication worksheets have been designed for more able students who need that extra challenge! We have more 2-digit multiplication worksheets, including 2-digit x 3-digit multiplication problems on this page. How to Print or Save these sheets Need help with printing or saving? Mean Mode Median and Range Problems Worksheets These Mean Mode Median and Range Worksheets are great for practicing how to compute mean, mode, median, and range for data sets of numbers. How to find the range Step 1) Put the data into an ordered list. Answer: the range is $32-9=23$. $(23+27) \div 2 = 25$ Answer: the mean is 25 Example 3) Find the median of 7, -4, 9, -7, -2, 5 Step 1) Order the numbers: -7, -4, -2, 5, 7, 9 Step 2) There is an even number of values in the set, so the median is the average of the middle two values. To find the range simply subtract the smallest number from the largest number. It is found by ordering the set of numbers and then finding the middle value in the set. Mode and Range Worksheets The sheets in this section will help you to solve problems involving bar graphs and picture graphs. How to find the mode Step 1) Put the data into an ordered list. Here you will find a range of Multiplication Worksheets to help you become more fluent and accurate with your tables. $35 \div 5 = 7$ Answer: the mean is 7. The 2nd sheet involves the use of decimals to 1dp. Our Multiplication worksheet generator will allow you to create your own custom worksheets to print out, complete with answers. Using these games will help your child to learn their multiplication facts to 5×5 or 10×10 , and also to develop their memory and strategic thinking skills. - If there is an odd number of values in the set, then the median is the middle value. Here you will find a wide range of free printable Worksheets, which will help your child learn how to find the mean, median, mode and range of a set of data points. Both lists have 11 data points. Step 2) Check that you have got the same number of data points. Take a look at some more of our worksheets similar to these. To get the average, simply add the two values together and divide by 2: $(-2 + 5) \div 2 = 1.5$ Answer: the mean is 1.5 The mode is the most common (or the data point that appears most often) in a set of data. Sheets 1 and 2 involve multiplying 2-digit numbers by 2, 3, 4 or 5. These sheets are aimed at 3rd graders. This gives us: 2, 3, 3, 3, 4, 4, 6, 6, 7, 8, 9 Step 2) Check the number of data points in both lists is the same. This gives us: -7, -5, -4, 0, 2, 2, 3, 6, 9, 11 Step 2) Check the number of data points in both lists is the same. These Mean, Mode, Median, and Range Worksheets are a great resource for children in Kindergarten, 1st Grade, 2nd Grade, 3rd Grade, 4th Grade, and 5th Grade. Step 3) The range is the difference or gap between the largest and smallest numbers. Step 3) The mode is the number which occurs most often.

18/05/2022 - Some of the worksheets for this concept are Word problems with integers, Grade 6 integers work, Notes unit 3 lesson 1 integers and absolute value, 6th grade common core math practice tests, 6th grade math study guides, 6th grade study guides, Accelerated mathematics chapter 2, Math 6 notes integers sol a b. org/math/pre-5 Des 2019 Here are 10 easy, pressure ... Whenever students face academic hardships, they tend to run to online essay help companies. If this is also happening to you, you can message us at course help online. We will ensure we give you a high quality content that will give you a good grade. We can handle your term paper, dissertation, a research proposal, or an essay on any topic. Mean Median Mode and Range Worksheets The sheets in this section will help you to find the mean, median, mode and range of a set of numbers, including negative numbers and decimals. There are easier sheets involving fewer data points, and harder ones with more data points. 6th grade math worksheets with answer key ; multiplication of linear equation ; ... Free printable Maths problem solving work sheets intermediate ; answers to math hw ; trigonometry calc download ; ... mode, median, mean differentiated KS2 worksheets ; Get 24/7 customer support help when you place a homework help service order with us. We will guide you on how to place your essay help, proofreading and editing your draft - fixing the grammar, spelling, or formatting of your paper easily and cheaply. Connected Teaching and Learning.
